# Pressure transmitter for general industrial applications Model A-10

WIKA Datasheet A-10

## **Applications**

- Mechanical engineering
- Machine tools
- Process control & automation
- Hydraulics & Pneumatics
- Pumps & Compressors

## **Special Features**

- Pressure ranges: from 0 ... 15 psi up to 0 ... 10,000 psi
- Non-linearity:  $\leq \pm 0.5\%$  BFSL ( $\leq \pm 0.25\%$  available)
- Signal output: 4-20 mA, 0-10 V, 0-5 V, others
- Electrical connection: DIN 175301-803 A and C, M12x1, 6 ft. cable, others
- Pressure connection: 1/4 NPT, 1/2 NPT, SAE #4, others available

#### **Description**

The WIKA A-10 pressure transmitter is precision engineered and manufactured to fit many industrial and OEM pressure measurement applications. The rugged design provides resistance to vibration, shock, wide temperature variations, RFI and other extreme environmental conditions that are typical of industrial and OEM applications.

Performance and reliability is enhanced by the all stainless steel welded measuring cell that eliminates the need for soft sealing materials that may deteriorate over time. The stateof-the-art manufacturing and assembly process increases the long term reliability of the A-10.

Primary applications include process control and automation, hydraulics, pneumatics, and machine controls.
